```csharp
namespace CounterTask
{
    internal class Program
    {
        static void Main(string[] args)
        {
            Clock myClock = new Clock();
            myClock.StartClock(56);
        }
    }
}
```
